

Protectorshell

Protectorshell-SP (Single Part)

Traditional clip-together Protectorshell convenience in a single-part design to minimize inventory and simplify underwater laying in poor visibility, etc. The clean, robust design you have come to expect from Protectorshell with added convenience and simplicity.

PS170-SP/480/10

| Specifications | |
|---|--|
| Segment Length - Overall | 554mm |
| Effective Installed Length/segment pair | 480mm |
| Minimum Internal Diameter | 170mm – recommended for cables up to 157mm Dia |
| Maximum External Diameter | 311/322mm |
| Wall Thickness | 10mm |
| Material | Ductile Iron to AS1831/ISO 1083/JS/400-12/S |
| Tensile Strength / Elongation | 400MPa / 15% |
| Impact Resistance | 12m Drop test or 26kg |
| Minimum Bend Diameter | 4.0m Nom / 3.00m Min |
| Weight per Segment | 30kg |
| Weight per installed metre (air) | 60kg |
| Weight per installed metre (water) | 52.3kg |
